

ALGUMAS NOMENCLATURAS EM GEOMETRIA ELEMENTAR

TRIÂNGULOS

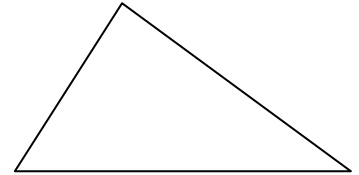

Classificação quanto aos lados:

três lados de medidas iguais
triângulo equilátero

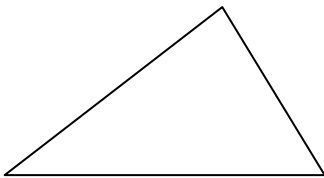

dois lados de medidas iguais
triângulo isósceles

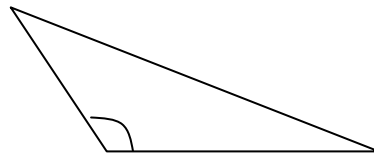

três lados diferentes
triângulo escaleno

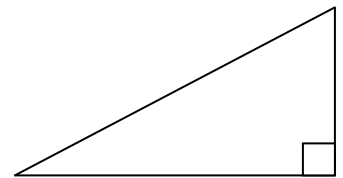

Classificação quanto aos ângulos:

todos os ângulos agudos
triângulo acutângulo

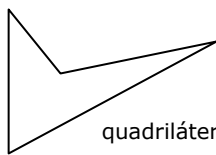

um ângulo obtuso
triângulo obtusângulo

um ângulo de 90°
triângulo retângulo

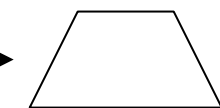

QUADRILÁTEROS

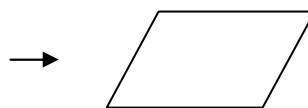

quadrilátero côncavo

quadrilátero
convexo

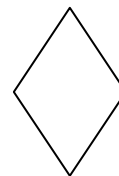

(2 lados paralelos)
trapézio

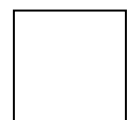

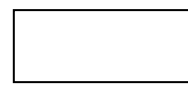

(2 pares de lados paralelos)
paralelogramo

(4 lados mesma medida)
losango

(4 ângulos retos)
retângulo

4 ângulos retos e 4 lados
de mesma medida
quadrado
